

Covid vaccination

Buckinghamshire Clinical Commissioning Group has written to GP surgeries asking them to tell patients the following:

“It is great news that one of the COVID19 vaccines will be reaching us soon and we are working across the patch for the safe delivery of the vaccine. GPs will not be the only service delivering the vaccine but, like the flu vaccine, they will focus on the most vulnerable groups first.

In the meantime, we would ask that people **do not contact GP surgeries** about when the vaccine will be available or to try to book an appointment for it. There will be information for the public soon which will tell you when and where you can get the vaccine and how to book.”
